La Mairie de Paris

Paris, le

20 SEP. 2018

Dear Mayor Eggertsson,

On November 12, Paris City Hall will host the Govtech Summit under the High Patronage of the President of the French Republic. The Summit launched at the initiative of entreprise Public, will gather elected representatives, entrepreneurs and representatives of the civil society to discuss the many opportunities offered by digital technology to improve public services and build public policies.

I am convinced that cities have a key role to play in modernising democratic practices. Therefore I would be honored if you could intervene in one of the round tables. The exchanges will provide an opportunity to highlight the necessary dialogue between cities, entities, citizens, companies and associations about innovative solutions and concrete projects aimed at creating a new public action.

Your participation would be especially valuable to highlight Reykjavík's experience on the matter and to present the policies implemented in your city.

A member of my team, Mr. Mathieu de la Souchère (mathieu.delasouchere@paris.fr), is at your staff's disposal, for any additional information they may require.

Yours sincerely.

A handwritten signature in black ink, reading 'Anne Hidalgo'.
