Dear mr. Tan Sri Dato' Seri Vincent Tan Chee Yioun,

Thank you for your kind letter.

I welcome your interest in the city of Reykjavík and share your enthusiasm for its future. I applaud your ambitious ideas for tourism development in the city which you present in your letter.

I agree full heartedly with your thoughts on the possibility of Reykjavik having a speedy recovery and will be welcoming international travellers in the upcoming months. As you are probably aware, tourism has gone through a strong growth phase in the city for the past few years. Furthermore and we are optimistic about the future of sustainable tourism in our city looking towards the coming years.

In your letter you mention a specific site on the Reykjavik harbour as a possible location for your project. The aforementioned site is an integral part of the harbour operating area which is a lifeblood of this city. As such it is not open for development as permanent construction of that magnitude would debilitate the operations of the harbour. Neither the city's municipal plan nor the local area plan allow for additional buildings on this site.

I would like to welcome you to enter into a dialogue with the city regarding alternative possible locations for your project which have a better strategic fit with the city's municipal plan and our future vision, The Green New Deal.

I strongly believe that we have numerous exiting possibilities for your project which I look forward to discussing further at your earliest convenience.

Yours sincerely

Dagur B. Eggertsson  
Mayor  
City of Reykjavik
