#TheThreeEuros

What can you get for just 3 EUR these days? Well, you do

After running an Icelandic reward based crowdfunding platform since 2012 with a world record success rate of +70%, **Karolina Engine** is being developed by the team to softwareise and standardize a best practices business solution in crowdfunding.

With **API connections** to our back end technology, crowdfunding platforms all over the world can connect to our **machine learning** and **business intelligence solution** to run their business on our technology.

Nordic Innovation

Crowdfunding is a growing market

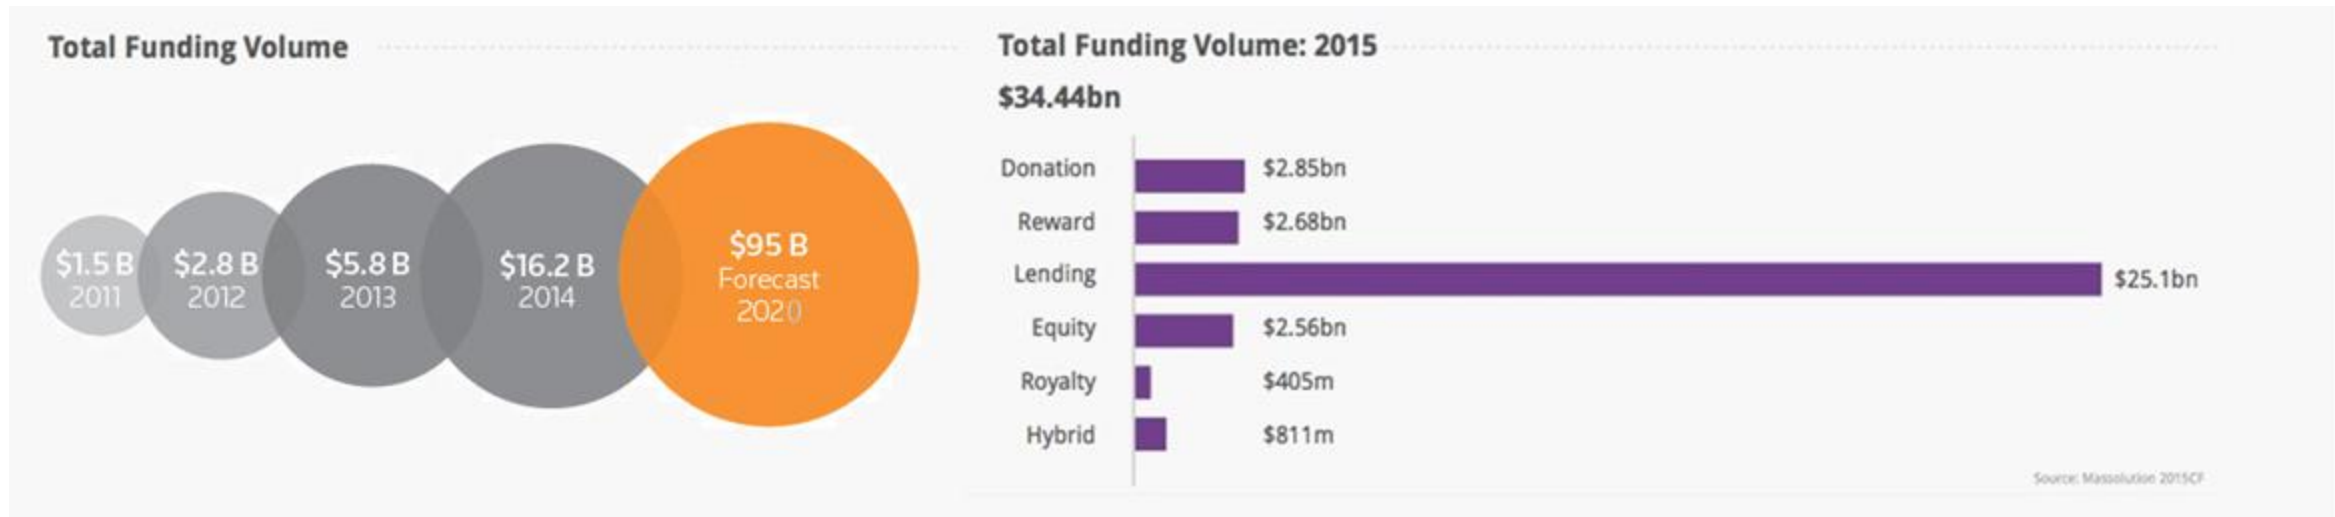

Annual Funding (Billions): VC vs. Crowdfunding vs. Angel

..and the number of crowdfunding platforms is growing at the same rate

Growth by crowdfunding region prediction for 2015 in millions of USD (research based estimate)

Local crowdfunding platforms all face the same problems

- A lot of effort goes in to maintaining a high success rate
- Running a proper platform with technical expertise is very, very expensive

..and that's why we developed

Karolina Engine

Launch smarter applications and platforms for crowdfunding

Our mission is to increase the performance and efficiency of platforms and campaigns by providing innovative solutions, expertise and collaboration.
